

Lesson 6 Only One Earth

[의사소통 기능]

- 알고 있음 표현하기

I heard that pens can't be recycled.

- 이해 상태 나타내기

I get it.

[언어 형식]

- 현재완료

Different types of waste have harmed the corals.

- 접속사 although

Although it took time to heal the sick corals, it was worth the hard work.

Listen & Speak A

1

B Wait! Don't throw that pen in the bin.

G Why not? It's plastic.

B I heard that pens can't be recycled. It's not all plastic.

G Oh, okay. Thanks.

2

G Nice bike! Do you ride to school every day?

B Yeah. Riding to school keeps the Earth clean.

G Oh, I get it. I'll start riding to school, too!

3

G1 Oh, you're using a hand towel.

G2 Yeah, I heard that paper towels use a lot of trees.

G1 That's right.

G2 And trees make the Earth green.

4

G I can't finish this sandwich.

B You know what? Wasting food is bad for the Earth.

G Why?

B Food waste makes greenhouse gases.

G Oh, I get it. I'll bring less food next time.

Listen & Speak B

B Hey, Jina. What are you doing?

G I'm deleting my emails.

B Why?

G I heard that storing emails uses a lot of energy.

B Really?

G Yeah, using too much energy is bad for

the Earth.

B Oh, I get it. I'll delete my emails, too.

G And you should also block spam and ads.

Review Lounge

1

G Hey, let's go to the library and study after school.

B We can't go. The library is closed this week.

G Really? Why?

B I heard that they're painting the walls.

2

G Did you know that dolphins sleep with one eye open?

B Really? Why?

G They keep one eye open to stay safe.

B Oh, I get it.

3

G Hi, Minsu. Why didn't you come to school today?

B Hi, Jiwoo. I have a bad cold.

G Oh, that's too bad. I hope you get better soon.

Living with Corals Again

A Diver's Diary

Date & Time: September 15, 5:30 p.m.

It's a sad day for me. This morning, I went scuba diving at my favorite spot in the sea. It was a place that was full of beautiful and colorful corals. But today, I saw that corals were getting sick. I was shocked. Because of the warm seawater, corals have turned white. Different types of waste have harmed the corals, too. Now the spot has lost its colors and beauty. I'm really worried.

Date & Time: October 2, 10:00 a.m.

I have thought about how to help corals. My plan is to form a team of divers. My team can go underwater and take care of the sick corals. Many corals get sick because they don't get good care in time. I'm sure that other divers are worried about this, too. I'm going to post a message online to look for volunteer divers.

Date & Time: November 7, 9:40 p.m.

For the last two weeks, my team has put ointment on sick corals. We also took some healthy baby corals from the sea and put them in tanks of seawater. We feed them clam parts and seaweed smoothies. This food helps baby corals grow stronger. When they are ready, we'll plant them onto the corals in the sea. Our goal is to grow many healthy corals. I look forward to seeing the results!

Date & Time: November 27, 11:30 a.m.

Last night, some healthy corals in the sea laid eggs during the full moon. This morning, hundreds of baby corals were born from the eggs like magic. They were cute and amazing. I hope this miracle will happen to other sick corals, too. Although it took time to heal the sick corals and grow healthy ones, it was worth the hard work.
