B: I agree with you.

◆ 언어 형식

- make/keep + 목적어 + 형용사

Writing about sports **makes me excited.**

- 간접의문문

Can you tell me **why** you became a sports journalist?

Listen and Talk

A1

G: We have math and English classes today.

B: Right. Sora, which do you prefer, math or English?

G: I prefer math to English.

B: Why is that?

G: Because math has clear answers to problems. How about you?

B: I like English better. I'm not good at math.

A2

B: Emma, what are you doing?

G: I'm making a travel plan for Jeju-do.

B: That sounds fun! Do you like to travel with plans?

G: Yes, I do. I can save time and energy with plans.

B: I agree with you. So, what are you planning to do in Jeju-do?

G: I'm planning to eat dombegogi and climb Hallasan.

A3

B: Yumi, do you like sports?

G: Sure. I love sports a lot.

B: Which do you prefer, team sports or individual sports?

G: I prefer team sports to individual sports. I like to work together as a team to reach our goals.

B: Yeah, I know you're working so hard with your soccer team.

G: Right. I love my team. How about you?

B: I prefer individual sports like swimming or running. I like to focus on myself when I exercise.

B

Chris: Yunseo, our field trip is tomorrow. How are we going to go to Central Park?

Yunseo: We can get there by bus or by subway,

Chris.

Chris: I prefer the bus to the subway.

Yunseo: Oh, why is that?

Chris: Because the bus is faster. It takes only 40

minutes to get to Central Park by bus.

Yunseo: I don't agree with you. The bus is not faster during rush hour.

Chris: Oh, really?

Yunseo: Yeah, it'll take more than an hour. The subway is much faster during that time.

Chris: I think you're right. Let's take the subway together.

Enjoy the clip

M: Hello, I'm Mr. Shin, your career teacher. Do you know that everyone is smart in some ways? You can be smart in music, body, people, word, logic, nature, self, and picture. For example, I prefer music to P.E. I'm a musicsmart person. If you prefer P.E., you may be a body-smart person. Do you like learning languages? Then, you may be a word-smart person. What kind of smart person are you?

Review

B: Ellen, what classes do we have in the afternoon?

G: Let me see. We have math and science classes.

B: Thanks. Which do you prefer, math or science?

G: I prefer science to math.

B: Why is that?

G: Because I love learning about experiments.

Voices from the Sports Field

Do you love sports? If you do, you can have a career in sports. Let's meet some people who are working in the sports field.

Hello, Ms. Ali. Can you tell me why you became a sports journalist? Well, I've always had a passion for sports and writing. Writing about sports makes me excited.

There was a big baseball game yesterday. How did you spend the day?

I arrived at the baseball park early. Before the game started, I had an interview with the players.

I took a lot of notes during the game. After the game, I went to the press conference with other journalists. I asked the players how they felt about the game.

In the afternoon, I had to write an article and edit it very quickly. My article was posted online. I love writing about sports.

Mr. Davis. Do you like your job as a sports agent?

Yes. I love sports, and I enjoy everything about business. I think my job is perfect for me.

Can you tell me more about your job?

When my clients have a new contract to sign, I check it carefully. I do my best to make the contract fair for them.

Also, I often receive phone calls from advertising companies. They want my clients in their advertisements. Then, I try to get the best deal for my clients.

I want to know why you wanted to be a sports statistician, Ms. Lee.

I wanted to be a sports statistician because I liked to analyze sports with numbers. Above all, I love ice hockey.

I don't know much about a sports statistician. Can you explain it to me?

A sports statistician is someone who collects data and studies numbers about sports games.

Our team is going to play against the Ice Lions this Saturday. Last week, I carefully watched the Ice Lions' games and analyzed their shots. I found that they let in 70 percent of the shots from the left side. This showed their left side was weak.

Then, I shared this finding with our players. I'm happy to use my data to help our team.
